

# INTEGRATED BIOMETRIC TURNSTILE<sup>IBT</sup>

Featuring fast, accurate face recognition technology which is unaffected by variant light conditions, our integrated turnstile can be installed anywhere in a working environment.

**If you don't believe us...give us a call**

The **IBT** consists of a secure site access portal utilising a full height 120 degree, three bar turnstile and our **CLOCKFACE** verification face recognition system, housed within a single unit.

Our uniquely designed **IBT** coupled with our face recognition technology records every entry and exit of all authorised staff and will not permit access to unauthorised individuals.

## Features and Benefits

- ✓ The unit is an off-the-shelf entry and exit solution that can be installed in hours.
- ✓ The system ensures that you know who is on site, instantly.
- ✓ Can be integrated with Proximity or Mifare cards or a keypad for card free use.
- ✓ Why invest in an **IBT**? You are 100% guaranteed to save money versus other entry systems. How?
  - ★ **Reduced wage bills**
  - ★ **Reduced employee fraud**
  - ★ **Reduced administration costs**
  - ★ **Reduced insurance premiums**
  - ★ **Reduced capital cost (no cabin, no security guard, no gate CCTV required)**
- ✓ **IBT**s can be delivered in either single or double configurations and can be networked together for larger sites.
- ✓ Health and safety graphics and individual messaging can be displayed to each operative.
